### 1 [Stable distributions, pseudorandom generators, embeddings, and data stream](#)

[computation](#)

Piotr Indyk

May 2006 **Journal of the ACM (JACM)**, Volume 53 Issue 3

Publisher: ACM Press

Full text available: [pdf\(146.78 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

In this article, we show several results obtained by combining the use of *stable distributions* with *pseudorandom generators for bounded space*. In particular:---We show that, for any  $p \in (0, 2]$ , one can maintain (using only  $O(\log n/\epsilon^2)$  words of storage) a sketch  $C(q)$  of a point  $q \in \mathbb{R}^p$  under dynamic updates of its coordinates. The sketch has the property that, given  $C(q)$  ...

**Keywords:** *data streams, dimensionality reduction, embeddings, norms, sketching*

### 2 [Implementation and evaluation of rational communicative behavior in coordinated defense](#)

Sanguk Noh, Piotr J. Gmytrasiewicz

### 3 [Papers: argumentation and dialog: What kind of argument are we going to have today?](#)

Eva Cogan, Simon Parsons, Peter McBurney

July 2005 **Proceedings of the fourth international joint conference on Autonomous agents and multiagent systems AAMAS '05**

Publisher: ACM Press

Full text available: [pdf\(374.01 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

This paper is concerned with argumentation-based dialogues between agents. Much work in this area has been based upon an influential taxonomy of dialogue types developed by Walton and Krabbe. This paper re-examines the Walton and Krabbe framework, concentrating on the preconditions for different types of dialogue and analyzing these in a systematic way. Doing so uncovers some inconsistencies in previous interpretations of the preconditions and, in resolving these inconsistencies, identifies a nu ...

EuroPARC is developing an integrated multi-media environment as an integral part of its formal and informal working environment. From our initial experiences with this kind of technology, we and our colleagues believe that it exhibits several qualitatively different properties, which seem to call into question many of our ideas about what computer systems are and how people relate to them. This has caused us to step back and take stock of the design principles we are using and, more general ...

3 [Engineering of markets and artifacts](#)

Eswaran Subrahmanian, Sarosh N. Talukdar

September 2003

**Proceedings of the 5th international conference on Electronic commerce ICEC '03**

Publisher: ACM Press

Full text available: pdf(109.77 KB) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

In this paper, we continue the dialog started by Roth [19] between economics and engineering in the context of design of markets. We take the position that markets and engineered artifacts are the products of a social process of design formulation. Our perspective is that designing of markets and artifacts follow the same kind of problem formulation and solution testing process. Further, we show through two case studies, that the design of engineered artifacts and markets are often interdep ...

Piotr Mirowski  
 Media Research Lab  
 New York University  
 719 Broadway, 12th floor  
 New York, NY 10003  
 mirowski [at] cs [dot] nyu [dot] edu

I am a second-year PhD student in the Computer  
 Science Department of the Courant Institute of  
 Mathematical Sciences at New York University.  
 My current scientific advisor is Prof. Yann LeCun,  
 who leads the Computational and Biological  
 Learning Lab, and is a faculty of the Media  
 Research Lab.

So far (Fall 2005 - Spring 2006), in addition to being a  
 Teaching Assistant for Unix Tools and Machine  
 Learning, I have taken classes in:  
 - Machine Learning  
 - Mathematical Foundations of Machine Learning
